recovery works!

1.)

it's easy

Your "One-Stop" Reclamation Service

If you want to make the environmentally responsible choice for carpet disposal, but you don't want added hassles for "doing the right thing," then our dedicated StarNet® Reclamation Program is for you. Just visit us online at www.starnetflooring.com and click on Reclamation. That will lead you to a StarNet Member who will assess the job and handle all the issues and details: pre, during and post removal.

We'll:

- Supply a comprehensive quote with no hidden expenses
- Remove the old carpet professionally
- Arrange transportation to a dedicated reclamation center
- Provide assurance that the material did not go to a landfill
- Document the procedure and submit records for compliance

2.)

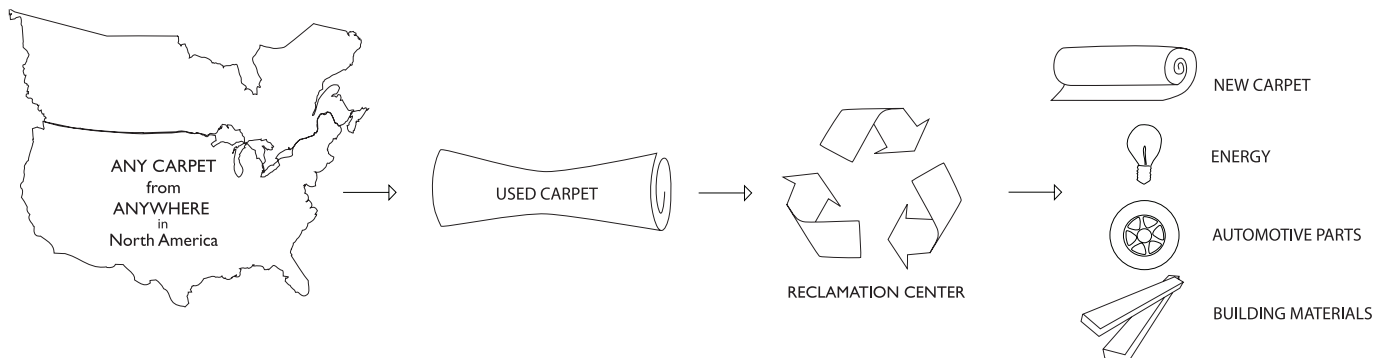

it's versatile

Everything Goes!

Some carpet reclamation programs look great until you read the fine print. Only this mill. Only this carpet. Only this fiber. Even if you could find the records, how realistic and customer friendly is that? Our dedicated program is different. We will reclaim any used carpet. From any mill. Made from any material. Installed any date and anywhere in North America. All fiber types and backing systems are eligible. Even carpet tile. Only our program is this versatile, because no two carpets are alike!

3.)

it's logical

We're in Step with Sustainability

Being environmentally responsible often means going beyond federal, state and municipal laws that govern the safe removal, transport and disposal of old carpet. We're the flooring project experts that are up to speed not only on regulations but also the latest voluntary programs, such as the ANSI Sustainable Carpet Assessment Draft Standard. A key provision of the draft standard includes end of life management for old carpet. Our reclamation program fulfills the requirements of this new voluntary standard. We know how to get the job done and document the process. We'll meet all the requirements and provide you with a certificate of reclamation. After removal we'll help you specify new environmentally friendly floor coverings, so that your building project continues to comply with the latest environmental regulations and sustainable guidelines. In short, we make it easy for you to be an environmental leader.

4.)

reclamation works!

A New Twist in Old Yarn

All carpets are shipped to our dedicated Reclamation Centers, and they are landfill diverted. Some fibers will be recycled in a "closed loop" process that transforms used carpet fibers into brand new nylon carpet yarn. Other fibers and backings will be recycled for use in new consumer and industrial parts, or converted from waste to energy. One thing is for sure-we guarantee that the carpet we remove and send to our Reclamation Centers will not be landfilled.

starnet members support sustainability efforts

A growing number of facility managers and architectural firms are specifying projects that not only meet regulations, but also go beyond compliance for a "greener" community.

CARPETAMERICARECOVERYEFFORTSM (CARE) is a voluntary initiative of the carpet industry and government to prevent carpet from burdening landfills. CARE focuses on market-based solutions for the reuse and recycle of old carpet by facilitating carpet reclamation and recycling methods. Many of the largest sponsors in CARE's Sustainability Leadership and Green Initiatives include mills and manufacturers that are StarNet vendor partners.

Leadership in Energy and Environmental Design (LEED[®]) is a voluntary consensus-based national standard for developing high performance, sustainable buildings. Members of the U.S. Green Building Council representing all segments of the building industry developed LEED and continue to contribute to its evolution. Many USGBC and LEED committee members are StarNet partners.

StarNet Members understand and can help you with new construction and renovation projects that contribute to CARE market-based solutions, and are eligible for LEED-rating and accreditation.

who can deal with all the complexities of a carpet reclamation project?

We can.

We are the North American cooperative of independent commercial flooring project professionals. When you contact a StarNet Member about carpet reclamation, be assured that our services are compliant, cost-competitive and hassle-free. We have the experience, resources and the desire to make your entire flooring project successful, including being "green".

our dedicated carpet reclamation service centers

All carpets removed from your building project are transported to a StarNet/CARE approved Service Center. These state-of-the-art facilities accept all carpets from anywhere in North America. No carpet is ever refused, so, there are no hidden surprises, unexpected delays or second guessing for you.

Please visit www.starnetflooring.com for specific information about a StarNet Member near you who can serve your carpet reclamation needs. It's easy and it works.
